### Racket Ready, String Savvy

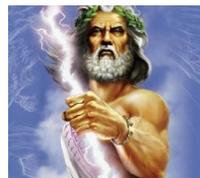

This week's question comes from FCTC member Liza Valero: "What are the pros and cons of using silk string?" Answer: With the regular version of Dunlop Silk, the pros are comfort and power. The string has a very soft feel when strung at mid-tension or slightly below, and power is easy to access for players of all levels. Silk also makes for an excellent cross string, if your main string is a stiffer, round and thin gauge poly. The con is certainly durability if you're a high level, hard hitter who uses a lot of topspin. There is also little help in the spin department, though this is probably not a string you would be choosing if that were your goal. Our stringing team of Kin and Ada are available to provide you with the best club stringing service in a timely manner. Email Kin at [kin@mwtennisacademy.com](mailto:kin@mwtennisacademy.com) with questions and for insight into how to customize your racket stringing.
