Racket Ready, String Savvy

Question of the Week: Should I string my racket differently in the fall and winter than I do in the summer?

Fall tennis weather has finally arrived! Many players will follow the "Spring forward and Fall back" adage with their string tension. Colder air is heavier and thicker. This means your ball moves slower, making it harder to put a shot away. Also, the cold makes your strings feel less lively. You can combat both of these issues by "falling back" on your string tension by 2 to 4 pounds. Bring your racket in for stringing and receive a can of Dunlop FORT tennis balls. Our stringing team of Kin and Ada are available to provide you with the best club stringing service in a timely manner. Email Kin at kin@mwtennisacademy.com with questions and for insight into how to get your racket playing its best over the next few months.
